

Professional Summary:

- Passionate and adaptable Computer Science professional with a strong academic background and over 5.5 years of experience in software development, data analysis, and knowledge transition to new team members.
- Especially around 3 years of experience in Ingenium application development.
- Skilled in quickly learning new technologies and driving innovative solutions to complex challenges.
- Proven ability to solve customer-facing issues with a focus on providing effective solutions and enhancing user satisfaction.
- Proficient in producing detailed analytical reports to support data-driven decision-making.
- Committed to delivering impactful results and eager to contribute to forward-thinking projects in collaboration with dynamic teams. Open to relocation for new opportunities.

Education:

Master's in Computer Science

*Old Dominion University,
Norfolk, Virginia, USA*

Bachelor of Technology in Computer Science

Jawaharlal Nehru Technological University Kakinada

Professional Experience:

Software Engineer

Webilent Technology | Apr 2025 – Apr 2026

- Promoted from Programmer Analyst (Apr 2025 – Jul 2025) to Software Engineer (from Aug 2025) while Contributing to the development of INGENIUM at DXC through Webilent for Equitable life insurance.
- Worked on EDO (Excelerator Deposit Option) Data Migration project for Equitable Life Insurance, ensuring accurate migration of policy and financial data.
- Developed COBOL batch programs based on the EDO Migration Approach Document, implementing defined migration logic and data processing standards.
- Authored Technical Specification Documents (TSD) to document data mapping, transformation rules, and batch processing workflows.
- Executed and monitored batch jobs, ensuring successful processing and validating outputs against expected results.
- Performed data validation and reconciliation between legacy and target systems to ensure data integrity post-migration.
- Implemented data correction and migration logic as per business rules (e.g., policy duration, premium dates, underwriting limits).
- Identified and resolved data inconsistencies and defects during functional and system testing phases.
- Collaborated with cross-functional teams (QA, business analysts, onshore and offshore teams) to ensure smooth migration cycles.
- Prepared and executed test cases, and generated output reports (XSOCE, batch outputs) for validation and documentation.
- Supported production deployment activities and performed post-deployment data verification.
- Utilized DB2 queries for data extraction, validation, and issue analysis.
- Contributed to root cause analysis and defect fixes, ensuring timely resolution within project timelines.
- Documented batch execution processes, validation results, and technical flows for audit and knowledge transfer purposes.

Graduate Research Assistant

Old Dominion University | Jan 2024 – Dec 2024

- Developed a Python-based solution to scan directories for missing .srt files associated with video files and automatically notify through email.
- Integrated Kaltura APIs to automate video uploads.
- Assisted in data cleaning and analysis for the IVY chatbot, refining questions into a more formal structure.
- Contributed to front-end development and interface enhancements to improve functionality and user experience.
- Participated in regular meetings with project supervisors, providing progress updates and discussing potential challenges or areas for improvement.
- Managed multiple research projects simultaneously, ensuring timely completion and adherence to high-quality standards.

Software Developer

LBK Soft Tech | Aug 2021 – Jun 2023

- Contributed to the development of INGENIUM, an online insurance policy administration platform used by DXC for life insurance companies through Mphasis.
- Specialized in Ingenium technology, COBOL, DB2, JSP, and RESTful services; enhanced password encryption functionality and supported life insurance policy systems for DXC Technology and DAI-ICHI Life Insurance.
- Contributed to multiple Ingenium releases (21.2, 22.1, 22.2, and 22.3), focusing on encryption features, RESTful service enhancements, and interface modifications for DXC Ingenium.
- Led key aspects of the PA Claims project for DAI-ICHI Life Insurance in Myanmar. Collaborated closely with cross-functional teams on the PA Claims project, creating detailed documentation to support API enhancements and ensure seamless implementation.
- Generated daily, weekly, and monthly life insurance policy reports through batch job processing.
- Improved software efficiency by proactively troubleshooting and resolving coding issues, saving time and resources by identifying and fixing bugs before deployment.
- Collaborated with cross-functional teams to ensure high-quality product delivery under tight deadlines.
- Enhanced user experience by designing and implementing user-friendly interfaces.
- Supported testing and quality assurance by defining acceptance criteria and developing test cases to validate functionality against business requirements.
- Designed and developed the official company website for LBK Soft Tech (<https://www.lbksofttech.com/>).
- Key responsibilities included preparing technical and module specifications, conducting unit testing, addressing client issues, developing functionalities, and offering technical insights in internal reviews.

Technical Instructor

LBK Soft Tech | Oct 2019 – Jul 2021

- Trained over 30 professionals in C programming, Core Java, COBOL, JSP, HTML, and database queries.
- Provided specialized training in INGENIUM technology and flow file management.
- Mentored new hires, resulting in stronger staff development and increased productivity.
- Provided one-on-one mentoring to help individuals reach their full potential within the organization.
- Collaborated with subject matter experts to create accurate training content.
- Enhanced trainee engagement through interactive workshops and hands-on activities.
- Facilitated virtual, in-person, and blended learning sessions.

Academic Projects:

Turning the Tide: Leveraging Green Infrastructure Solutions to Address Coastal Flooding in the Hampton Roads Datathon Project | 2025

- Hampton Roads is increasingly threatened by climate change, resulting in coastal flooding and wetland loss. These issues endanger local ecosystems, infrastructure, and public health, necessitating innovative green infrastructure solutions.
- Our project focuses on raising awareness of these challenges, promoting eco-friendly rain gardens, engaging the community, and providing an interactive planning tool. Rain gardens absorb excess stormwater, reducing runoff by up to 50% and removing up to 90% of pollutants.
- GardenMe HRGP is our key initiative—an interactive online tool designed as a rain garden planner and impact simulator. It allows residents to visualize their properties, design rain gardens, and simulate their effects on flooding, all through a user-friendly, mobile-compatible platform.
- Through real-time visualizations and community involvement, "Turning the Tide" aims to empower Hampton Roads residents to adopt sustainable practices and build resilience against climate change challenges.

Exploring Obesity Trends Across Age Groups, States, and Race/Ethnicity Over Time

Master's Project – Group project | 2025

- Leading team efforts in research focused on overweight and obesity, contributing heavily to project development and data analysis. Currently, our objective is to explore key factors influencing obesity rates across U.S. states.
- Specifically, the study will examine the correlation between childhood and adult obesity rates. It will also investigate trends in obesity rates over time, with a particular focus on how poverty and income levels contribute to these changes.
- Additionally, the analysis will assess the impact of poverty and income on obesity rates in children aged 0-4 and 5-17. Lastly, the research aims to identify significant changes in obesity rates among different race/ethnicity groups over time within various states.

Comparative Study of Global Unemployment Rates (1991–2022)

Master's Project – Individual project | 2025

- Conducted research comparing global unemployment rates before and after the COVID-19 pandemic, with a focused analysis of trends in India and the United States from 1991 to 2022.
- Identified key factors contributing to differences and similarities in unemployment trends between the two countries.
- Analyzed large datasets using Excel and proprietary tools to assess performance and trends, and produced visual results to demonstrate the impact of the COVID-19 pandemic on unemployment rates.

Framework for Data Protection in Social Networking Sites

Bachelor's Major Project | 2024

- Led a team in developing a data protection framework for social networking sites using Python, HTML, CSS, and MySQL.
- Implemented facial feature measurement techniques to enhance user security.

Technical Skills:

- Programming Languages: Python, Java, COBOL, C, JavaScript, JSP
- Web Development: HTML, CSS, RESTful Services, JSON, API Integration
- Industry-Specific: Ingenium (Insurance Domain)
- Databases: DB2, MySQL, SQL, MongoDB, PostgreSQL

- Technical Tools: Microsoft Excel, Word, PowerPoint, Visual Studio, Power BI, Weka, MATLAB, Google Colab
- Collaboration & Project tools: Kaltura, Jira, Monday.com, FileZilla, Git/GitHub
- Data Analysis & Visualization: Power BI, Tableau, Pandas, NumPy, Matplotlib, Seaborn, OpenRefine
- Data Techniques: Data Cleaning, Transformation, Statistical Analysis, Trend Analysis, Reporting
- Process Management: Project tracking, cross-team coordination, timeline management

Soft Skills:

- Analytical Thinking & Problem Solving: Strong analytical thinking to solve complex technical and business problems.
- Communication & Presentation Skills: Adept at translating complex data into actionable insights.
- Adaptability & Quick Learning: Proven ability to quickly learn and implement new technologies and tools.
- Time Management & Prioritization: Expertise in managing priorities, meeting tight deadlines, and ensuring high accuracy.
- Collaboration & Teamwork: Ability to work effectively with cross-functional teams.

Languages:

- Telugu (Native & Fluent)
- English (Professional)

Certifications & Achievements:

- AWS Certified Cloud Practitioner (Foundational) – Amazon Web Services: Verified certification demonstrating foundational knowledge of AWS Cloud, core services, cloud concepts, security, and pricing — Issued Mar 2025 | Expires Mar 2028
- Google Data Analytics Professional Certificate (Coursera – Google): Completed 8-course certification covering data analysis, data cleaning, visualization, SQL, R, and case study projects — Issued Mar 2025
 - ✓ Google Data Analytics Specialization (Credential ID: VJ5UKR8FSAH2) - Issued Mar 2025
 - ✓ Analyze Data to Answer Questions (Credential ID: SDYIBLSAU7NS) - Issued Mar 2025
 - ✓ Prepare Data for Exploration (Credential ID: JLRDOCJSPKO0) - Issued Mar 2025
 - ✓ Process Data from Dirty to Clean (Credential ID: XF38P4KUH45W) - Issued Mar 2025
 - ✓ Google Data Analytics Capstone: Complete a Case Study (Credential ID: 4IXK2LP12ZFL) - Issued Mar 2025
 - ✓ Data Analysis with R Programming (Credential ID: C71BBV5B0CIX) - Issued Mar 2025
 - ✓ Share Data Through the Art of Visualization (Credential ID: 0GN7TGBXVNH8) - Issued Mar 2025
 - ✓ Ask Questions to Make Data-Driven Decisions (Credential ID: LSRM8ATKN5YV) - Issued Mar 2025
 - ✓ Foundations: Data, Data, Everywhere (Credential ID: QQ2MNH207GT7) - Issued Feb 2025
- CISCO Networking Academy: Earned badges in Introduction to Cybersecurity, Packet Tracer, Cyber Security Essentials.
- Completed Job Application Essentials through IBM Skills Build.
- Top position in Mathematics and Physics in EAMCET at Intermediate College.
- Completed internship with Cisco, creating 5 projects on packet tracer for wireless network installation.
- Extensive training in Ingenium application programming and RESTful web services.
- Participated in the development of job-related tools and platforms during B.Tech and Master's programs.
